AI IMPACT REPORT NO. 293 · REVISED 5 OCTOBER 2026 · 250 ROLES COVERED

Strategy Consultants

AI fundamentally restructuring market analysis, strategic formulation, and client advisory for consultants.

EXPOSURE	WINDOW	ADOPTION TODAY	READING
64 High exposure	2–5 yrs until change lands	High	Substantial automation of routine work. Exposure is the share of today's work AI can plausibly take on within the window.

§ 01 WHAT IS HAPPENING

What is happening to strategy consultants

Impact

AI tools are autonomously analyzing market dynamics, identifying disruptive opportunities, building complex strategic models, and streamlining administrative tasks. This compels Strategy Consultants to radically pivot towards high-level problem framing, transformative innovation, ethical oversight of AI-driven advice, and fostering irreplaceable human capital development.

Risk

Radical role overhaul; pervasive automation leading to significant workflow redefinition and specialized human focus.

The Strategy Consultant role is undergoing a profound and accelerating redefinition by AI. AI will assume command of vast routine data collection, initial market analysis, and much of the administrative burden. Strategy Consultants must immediately pivot to becoming experts in leveraging AI for hyper-efficiency and enhanced strategic insights, intensely validating AI outputs for accuracy and fairness, and dedicating their expertise to the irreplaceable human elements of the role: profound problem framing, nuanced client relationship building, and critical ethical decision-making regarding complex organizational transformations and societal impact.

Sector readiness

Rapid & Transformative Integration

The management consulting sector, particularly strategy firms, is aggressively integrating AI, driven by overwhelming client demand for efficiency, data-driven insights, and accelerated strategic solutions. AI is rapidly moving beyond pilot stages to widespread adoption for market analysis, strategy formulation, and prescriptive advice, fundamentally altering traditional workflows and value propositions.

§ 02 POSITION

Where you stand

i The Strategy Consultant role is undergoing a profound and accelerating redefinition by AI, fundamentally restructuring market analysis, strategic formulation, and client advisory.

ii AI will autonomously manage vast data, optimize strategic scenarios, and streamline content, compelling Consultants to pivot to indispensable problem framing and profound client relationship building.

iii Survival and impact will hinge on Strategy Consultants mastering AI tools, critically validating AI outputs for ethics, championing ethical AI, and providing irreplaceable human judgment and leadership at the heart of complex organizational transformations.

§ 03 ACTIONS 15 POINTS

What this means for you

Concrete changes to how the work gets done, in the order you are likely to meet them.

01 **AI-Driven Autonomous Market & Competitive Intelligence.** Strategy Consultants will command AI systems that autonomously scan vast global datasets (e.g., market reports, competitor filings, news, social media, economic indicators) to identify emerging trends, analyze competitive landscapes, and spot disruptive threats. This radically frees consultants from manual research, demanding focus on strategic interpretation and actionable insights.

02 **AI-Powered Strategic Scenario Modeling.** Strategy Consultants will leverage AI models that autonomously simulate countless future business scenarios, predict market shifts, and rigorously assess the impact of various strategic decisions (e.g., M&A, new product launches, geopolitical shifts) with unprecedented speed and complexity. This provides radical foresight for strategic planning.

03 **Automated Industry & Sector Analysis.** AI tools will autonomously collect, clean, and synthesize vast amounts of industry-specific data (e.g., value chain analysis, supply chain dynamics, regulatory changes) from disparate sources. This significantly reduces manual data wrangling, allowing consultants to focus on deep strategic synthesis and competitive positioning.

04 **Generative AI for Strategic Deliverables & Client Pitches.** AI will autonomously draft initial versions of executive summaries, strategic reports, detailed proposals, and client presentations. Strategy Consultants will rigorously refine these AI-generated documents for tone, accuracy, strategic messaging, and ensuring they reflect the client's unique context and the firm's intellectual property.

05 **AI-Assisted Problem Formulation & Root Cause Analysis.** AI tools are autonomously assisting Strategy Consultants in identifying and precisely defining complex business problems. By analyzing internal and external data, AI can pinpoint root causes of underperformance, market failures, or strategic misalignments with greater accuracy.

06 **Focus on Nuanced Client Relationship & C-suite Influence.** As AI assumes command of data-driven tasks, the paramount value of Strategy Consultants will be their irreplaceable human ability to build profound, trust-based relationships with senior client executives, navigate complex organizational politics, and inspire decisive action for strategic change.

07 **AI-Driven Business Model Innovation.** Strategy Consultants will utilize AI to autonomously identify opportunities for new business models, revenue streams, and disruptive strategies. AI can analyze market gaps, technological capabilities, and competitive advantages to suggest novel approaches to value creation.

08 **Ethical AI in Strategic Advice & Algorithmic Accountability.** Strategy Consultants will bear profound responsibility for auditing AI systems for algorithmic bias (e.g., in strategic recommendations, market predictions), ensuring client data privacy, and upholding the highest ethical standards for fair and equitable advice with societal impact.

09 **Human-AI Teaming for Strategic Insights.** Strategy Consultants will operate in seamless human-AI teams. AI will process vast data, generate insights, and automate routine tasks, while the human consultant leads strategic client engagement, manages nuanced human factors, and ensures the successful implementation of AI-driven strategies.

10 **AI for Mergers & Acquisitions (M&A) Strategy.** Strategy Consultants will leverage AI tools to rapidly identify potential acquisition targets, autonomously assess strategic fit and synergy opportunities, and analyze market impact. This radically accelerates M&A strategic planning and due diligence.

11 **Continuous Learning & Deep Industry AI Literacy.** The exponential pace of AI integration in consulting and across industries demands that Strategy Consultants commit to continuous, aggressive learning of new AI-powered tools, industry-specific technologies, and their profound capabilities and ethical implications.

12 **Specialization in AI Strategy & Digital Transformation.** The field will see a rise in Strategy Consultants specializing in advising clients on AI adoption strategies, designing AI-driven business models, and overseeing the implementation of complex AI solutions across various sectors and functions.

13 **AI-Driven Organizational & Workforce Transformation.** Strategy Consultants will utilize AI to autonomously analyze client workforce data, communication patterns, and skill gaps to design optimal organizational structures and develop aggressive talent transformation roadmaps.

14 **AI for Competitor Disruption Analysis.** AI tools will autonomously collect and analyze vast amounts of competitive intelligence data (e.g., product launches, pricing, market share, R&D investments), providing real-time benchmarking and insights into competitor disruption strategies for clients.

15 **Strategic Problem Formulation & Persuasion.** As AI streamlines analysis, the human skill of Strategy Consultants in precisely formulating a client's core problem, articulating the profound strategic value of AI-driven solutions, and compelling senior executives to adopt transformative change becomes paramount.

§ 04 CAUSES 10 DRIVERS

What is pushing this change

01 **Explosive Growth of Global Business & Market Data.** Vast amounts of data from global markets, economic indicators, competitor actions, and operational metrics provide rich input for AI models.

02 **Revolutionary Advancements in AI/ML (Predictive, Generative, Prescriptive Analytics).** Breakthroughs in AI fields enable sophisticated analysis, autonomous prediction, and intelligent recommendations for complex business challenges.

03 **Urgent Demand for Hyper-Speed Strategic Insights.** CEOs and boards require rapid, data-informed strategic insights to gain and maintain competitive advantage in dynamic markets.

04 **Pervasive Digital Transformation Across Industries.** AI is the central pillar of digital transformation, enabling interconnected and intelligent operations across client enterprises.

05 **Intense Global Competition & Disruption.** AI is used by competitors for strategic advantage, compelling clients to adopt AI for survival and growth, driving demand for consulting.

06 **Relentless Pressure for ROI & Shareholder Value.** AI automates research, optimizes processes, and predicts inefficiencies, driving aggressive cost reductions and higher ROI for clients.

07 **Complexity of Global Business Models & Ecosystems.** Managing intricate global operations, diverse supply chains, and complex customer journeys benefits from AI synthesis and optimization.

08 **Client Expectations for Data-Driven & AI-Powered Solutions.** Clients increasingly expect consulting firms to leverage AI for deeper insights and more effective, AI-powered solutions.

09 **Shortage of Specialized Analytical Talent.** The demand for strategy consultants who can bridge advanced analytics with business strategy often outstrips supply, increasing reliance on AI tools.

10 **Ethical Scrutiny of AI & Business Practices.** Growing concerns about algorithmic bias, fairness, and transparency extend to business practices and strategic recommendations.

§ 05 VARIATION 5 SECTORS

Impact by sector

The headline figure is an average. Where you work changes the picture.

Corporate Strategy Consultants	AI for deep market analysis, strategic scenario modeling, and competitive intelligence to define corporate direction. Focus on long-term value creation.
Growth & Innovation Strategy Consultants	AI for identifying new market opportunities, disruptive business models, and optimizing R&D portfolios. Focus on driving radical innovation and growth.
Digital Strategy Consultants	AI for enterprise AI strategy, cloud transformation roadmaps, and designing AI-driven business models for clients. Focus on technology as a strategic lever.
M&A Strategy Consultants	AI for target identification, synergy analysis, and due diligence in mergers & acquisitions. Focus on value creation through strategic transactions.
Organizational Strategy Consultants	AI for workforce analytics, talent transformation roadmaps, and optimizing organizational structures for clients. Focus on human capital as a strategic asset.

§ 06 PREPARATION 8 SKILLS

Skills to build

The skills that keep the human part of this work valuable as the routine part is automated.

01 **Strategic Problem Formulation & Framing.** The profound ability to identify and precisely define complex, ambiguous strategic challenges, setting the right direction for AI-driven solutions.

02 **AI/Data Science Literacy (Strategy Focus).** Profound understanding of AI capabilities in strategic analysis, data synthesis, and modeling, and the ability to interpret AI outputs for executive decision-making.

03 **Client Relationship Management & Empathy.** The irreplaceable human ability to build deep, trust-based relationships with senior client executives, navigate politics, and inspire buy-in for transformative strategic change.

04 **Visionary Leadership & Persuasion.** Expertly structuring compelling strategic narratives, delivering impactful presentations, and influencing executive decisions through data-driven recommendations and visionary thinking.

05 **Ethical AI Governance & Responsibility.** Upholding the highest ethical standards, ensuring client data privacy, and rigorously auditing AI strategic recommendations for fairness and unintended consequences, especially societal impact.

06 **Data Analysis & Prescriptive Insights.** Ability to autonomously analyze vast datasets, synthesize complex information, and generate prescriptive insights that drive radical strategic and operational improvements.

07 **Change Management & Implementation.** Leading client organizations through profound strategic transformations, managing resistance to change, and ensuring successful implementation of AI-driven strategies.

08 **Industry & Disruptive Innovation Expertise.** Deep knowledge of specific industries and their unique challenges, competitive dynamics, and potential for AI-driven disruption and innovation.

§ 07 INSTRUMENTS 12 ENTRIES

Tools in use

KINDS OF TOOL WORTH KNOWING

01 **AI-Powered Market & Competitive Intelligence Platforms.** Platforms that autonomously analyze vast market data, industry reports, news, and competitor filings to provide real-time strategic intelligence.

02 **AI-Driven Strategic Scenario Modeling Tools.** Software that leverages AI to autonomously simulate complex business scenarios, predict market shifts, and assess the impact of strategic decisions.

03 **Generative AI for Strategic Content & Pitches.** Large Language Models (LLMs) used to autonomously draft initial versions of strategic reports, executive summaries, proposals, and client presentations.

04 **AI for Business Model Innovation & Disruption Analysis.** AI tools that autonomously identify opportunities for new business models, disruptive strategies, and innovative value creation based on market analysis.

05 **AI for Workforce & Organizational Analytics.** AI software that autonomously analyzes employee data for talent forecasting, skill gap identification, and organizational design optimization.

06 **AI-Assisted M&A Strategy Platforms.** AI-powered platforms that accelerate and enhance due diligence processes and target identification for mergers and acquisitions.

NAMED TOOLS ALREADY IN USE

AlphaSense VISIT
AI-driven market intelligence platforms that synthesize insights from unstructured text and data sources for strategic decision-making.

Anaplan VISIT
Leading enterprise planning platform increasingly leveraging AI for advanced strategic modeling and scenario planning.

ChatGPT VISIT
Generative AI models that can autonomously draft various consulting documents, from strategic reports to client proposals and presentations.

TestFit (Illustrative of generative design concept for business) VISIT

A generative design tool for architecture, whose principles are adaptable to business model design by autonomously exploring configurations.

Visier VISIT

Workforce planning and analytics platforms that leverage AI to provide insights into talent trends and organizational structure.

DealCloud VISIT

Platforms providing data and increasingly AI-driven insights for deal sourcing, due diligence, and relationship management in M&A.

§ 08 EXAMPLES 5 EXAMPLES

In practice

Ways people in this role are already using AI, and what they get from it.

Automate Market Entry Analysis

EXAMPLE 1

HOW Strategy Consultants will oversee an AI-powered market intelligence platform. The AI will autonomously analyze vast global market reports, consumer data, and competitive landscapes. The AI will then identify optimal market entry strategies or new product launch opportunities, generating a strategic brief.

GAIN Provides hyper-accurate and rapid market foresight, enabling proactive strategic adjustments for clients and identifying new growth avenues.

Simulate Strategic Scenarios

EXAMPLE 2

HOW Strategy Consultants will utilize an AI model that autonomously simulates the financial and operational impact of various strategic decisions (e.g., M&A, new product lines, market expansions). The AI will run thousands of scenarios, providing predictive insights for risk and ROI.

GAIN Offers unparalleled strategic foresight, quantifies risks and opportunities, and allows for data-backed decision-making in complex business transformations.

Generate Presentation Drafts

EXAMPLE 3

HOW Strategy Consultants can instruct a generative AI tool to draft a new client presentation. By providing key findings, strategic recommendations, and desired visuals, the AI will autonomously generate slides, content, and speaking notes for the consultant's refinement.

GAIN Saves significant time on content creation, ensures consistent messaging, and allows consultants to focus on high-level strategic influence and client engagement.

Discover Disruptive Business Models

EXAMPLE 4

HOW Strategy Consultants will leverage an AI platform that autonomously analyzes industry trends, technological advancements, and consumer behavior patterns. The AI will identify potential disruptive business models or new value propositions that could challenge existing market leaders, suggesting radical innovation paths.

GAIN Identifies unprecedented opportunities for competitive advantage, enables proactive adaptation to market shifts, and supports radical business model innovation.

Provide AI-Assisted Expert Interviews

EXAMPLE 5

HOW Strategy Consultants can use an AI tool that autonomously sifts through transcripts of expert interviews or earnings calls. The AI identifies key insights, sentiment, and emerging trends relevant to a client's strategic challenge, providing a synthesized brief for the consultant.

GAIN Accelerates research by synthesizing expert opinions, identifies key industry trends, and informs strategic recommendations with diverse perspectives.

§ 09 CONTEXT

How this role compares

Three neighbouring roles chosen to show the direction of travel.

Junior Consultants (Routine research, data gathering) / Research Analysts (Basic industry data)

MORE EXPOSED

AI IMPACT Catastrophic (AI can autonomously conduct vast market research; AI can handle data collection and basic synthesis.)

WORK MOVES TO Immediate need for radical re-skilling into AI oversight, data quality management for AI, or specialization in advanced problem framing.

AI Strategy Consultants / Chief AI Officers (CAIOs) (Client-facing)

DIFFERENT SKILLS, GROWING

AI IMPACT Foundational (They design and build the AI-driven business models and capabilities that consultants advise on; immense demand.)

WORK MOVES TO Deep expertise in AI/ML strategy, business model innovation, and leading large-scale AI adoption across industries.

Client Executives (Strategic client relationships) / Behavioral Scientists (Qualitative human insights)

COMPLEMENTARY, LESS EXPOSED

AI IMPACT Low-Moderate Augmentation (AI assists in client data analysis for executives; AI helps with behavioral data for scientists), but core human relationship building, executive presence, and nuanced psychological insight remain paramount.

WORK MOVES TO Building long-term, high-trust client relationships (Client Executives); Deep qualitative understanding of human behavior and organizational dynamics (Behavioral Scientists).

§ 10 VERDICT

Closing judgement

> For Strategy Consultants, AI is not merely a tool but a radical force of transformation that will fundamentally redefine their value proposition. It will autonomously handle vast data analysis, accelerate strategy formulation, and streamline content, compelling consultants to pivot to indispensable problem framing, profound client relationships, and ethical oversight. The future Strategy Consultant will be a visionary orchestrator of human-AI collaboration, providing irreplaceable leadership at the heart of organizational transformation.

§ 11 BASIS REVISED 5 OCTOBER 2026

Evidence and revisions

What the exposure figure rests on, what changed when it was last revised, and the published work cited for this role.

SCORE

60 to 64

WINDOW

2-5 years (unchanged)

The 5 October 2026 review moved the score up by 4 points.

Exposure Index v2. Inputs: task applicability 71/100 (Microsoft AI applicability score 0.35 for Management analysts); observed usage 32/100 (Anthropic observed exposure 0.24); official exposure tier 100/100 (BLS: very high); labour-market trajectory 25/100 (BLS projects employment to grow 10.1% over 2025–35); published adoption rating 70/100 (high adoption). Weighted base 64.2. Final score 64. The previous figure of 60 was raised by 4 points, a small change that comes from moving off scores rounded to the nearest five. The change window is unchanged.

HOW THE FIGURE IS BUILT (EXPOSURE INDEX V2)

Task applicability — Microsoft Research, AI applicability score	71 × 35%	24.7
Observed usage — Anthropic Economic Index, observed exposure	33 × 20%	6.5
Official exposure tier — US BLS AI-exposure category	100 × 20%	20.0
Labour-market trajectory — US BLS projected employment change 2025–35	25 × 10%	2.5
Published adoption rating — This report's adoption level	70 × 15%	10.5
Weighted base		64.2
Exposure score		64

MEASURES BEHIND THE SCORE

US Bureau of Labor Statistics · *Employment Projections 2025–35 and AI Exposure Categories* (27 August 2026)

AI-exposure tier: Very high. Projected employment change 2025–35: +10.1%. Matched to Management analysts.

PUBLISHER PDF ARCHIVED COPY

Microsoft Research · *Working with AI: Measuring the Applicability of Generative AI to Occupations* (10 July 2025)

AI applicability score 0.35 (percentile 97 of 785 occupations) for SOC 13-1111.

PUBLISHER PDF ARCHIVED COPY

Anthropic · *Anthropic Economic Index report: Cadences* (26 June 2026)

Observed exposure 0.24 for SOC 13-1111 (percentile 88 of 756 occupations).

PUBLISHER PDF

UK Department for Science, Innovation and Technology · *Assessment of AI capabilities and the impact on the UK labour market* (28 January 2026)

UK context: around 70% of UK workers are in occupations with tasks AI could perform or enhance, above the US average; a one-standard-deviation rise in exposure was associated with a 3.9% fall in UK job postings.

PUBLISHER ARCHIVED COPY

ALSO CITED FOR THIS ROLE

Microsoft · *2026 Work Trend Index Annual Report: Agents, human agency and the opportunity for every organization* (5 May 2026)

Microsoft's 2026 Work Trend Index documents the shift toward managing agents alongside people; leadership roles change in content more than in headcount.

PUBLISHER PDF

PwC · *2026 Global AI Jobs Barometer* (May 2026)

PwC finds AI-exposed sectors recording 34% productivity growth since 2018 against 24% for the least exposed; managerial roles capture the gains where they redesign work.

§ 12 APPENDIX

Method and sources

Each report was written from a large body of published research. The exposure score itself is computed, not written: it is the CareerGuard Exposure Index, a weighted average of occupation-level measures from the US Bureau of Labor Statistics (AI-exposure classification and 2025–35 projections), Microsoft Research (AI applicability scores) and Anthropic (observed exposure), together with the adoption rating published on the report. The organisations and publications below are the standing literature behind the narrative sections. Every source, with dates, licences and archived copies where we are permitted to hold them, is catalogued in the research library.

Exposure Index v2 (October 2026). Each input is scaled to 0–100 and weighted: task applicability 35% (Microsoft AI applicability score ÷ 0.5), observed usage 20% (Anthropic observed exposure ÷ 0.75), official exposure tier

20% (BLS very high = 100, high = 70, moderate = 40, low = 10), labour-market trajectory 10% (50 2.5 × projected % employment change), published adoption rating 15% (very high = 85, high = 70, medium-high = 55, medium = 40, low-medium = 25, low = 10). Inputs not measured for an occupation are dropped and the remaining weights renormalised. An editorial adjustment of at most ±12 points is allowed only for automation channels the measures cannot see (robotics, self-service, machine vision, medical imaging, RPA/OCR, generative video) and is always logged with its reason. Scores are whole numbers, not rounded to five. The change window shifts one notch (a year at each end) per ten points of movement.

I GLOBAL AND MACROECONOMIC IMPACT OF AI ON WORK

World Economic Forum

The Future of Jobs Report series — Employer survey of expected job growth and decline, skill shifts and technology adoption (2020, 2023 and 2025 editions); Artificial Intelligence and the Future of Entry-Level Work (2026).
AI governance and transformation reports — Frameworks on ethical AI, talent strategy and industry transformation.

McKinsey Global Institute

AI, Automation and the Future of Work series — Research quantifying automation potential by task, sector and demographic, from "Jobs Lost, Jobs Gained" to "Agents, robots, and us" (2025).
Industry-specific reports — Financial services, healthcare, manufacturing and others.

PwC

Global AI Jobs Barometer — Annual analysis of job postings and productivity by AI exposure (2024–2026 editions).
Upskilling Hopes and Fears survey — Employee perceptions and readiness.

Microsoft Research and Anthropic

Working with AI (2025); Anthropic Economic Index (2025–2026) — Occupation-level usage data from Copilot and Claude conversations, the two observed-usage measures behind the 2026 revision.

Stanford Digital Economy Lab and Stanford HAI

Canaries in the Coal Mine? (2025–2026); AI Index Report (annual) — Payroll evidence on early-career employment in exposed occupations; annual measurement of AI capability, investment and adoption.

Deloitte

Human Capital Trends series — Workforce, talent and HR technology trends.
Tech Trends series — Emerging technologies and their business implications.

Accenture

Technology Vision series — Forward-looking analysis of emerging technology, with emphasis on AI.
Fjord Trends — Design, innovation and human experience in a digital world.

Boston Consulting Group

AI/ML insights and industry solutions — "The AI Revolution in the Workplace" and related research.

EY

AI and workforce reports — Adoption, talent strategy and ethics.

IBM Institute for Business Value

AI and automation studies — Business models, workforce evolution and leadership.

OECD

AI Policy Observatory — International data and policy on AI, labour markets and skills.
Employment Outlook — Labour-market trends including technological impact (2023–2026 editions).

International Labour Organization

Generative AI and Jobs: A Refined Global Index of Occupational Exposure (2025) — Task-level exposure gradients for every ISCO occupation; successor to the 2023 global index.

International Monetary Fund

Staff Discussion Notes on AI and work (2024, 2026) — Complementarity framing: where AI augments and where it substitutes.

UK Department for Science, Innovation and Technology
Assessment of AI capabilities and the impact on the UK labour market (2026) — UK occupational exposure and job-posting evidence.

Brookings Institution
AI and automation research — Economic and social implications, displacement and skills.

Yale Budget Lab and Goldman Sachs Research
Tracking the Impact of AI on the Labor Market; AI and the US labour market (2026) — Aggregate labour-market monitoring; macro displacement estimates.

Oxford University (Oxford Martin School)
The Future of Employment — Frey & Osborne and subsequent research on susceptibility to automation.

MIT Technology Review
AI & Work — Reporting on AI research and its implications for industries and jobs.

Gartner
Hype Cycle for Artificial Intelligence — Maturity and adoption of AI technologies.
Future of Work reports — Workplace models and talent strategy.

U.S. Bureau of Labor Statistics
Employment Projections 2025–35; AI Exposure Categories; Occupational Outlook Handbook — Ten-year employment projections and, from the 2025 cycle, an AI-exposure tier for every detailed occupation.

Indeed Hiring Lab
AI at Work Report (2025) and posting-market updates — Skill-level transformation estimates and job-posting trends by occupation.

II CORE AI AND MACHINE-LEARNING RESEARCH

OpenAI
Research papers, blog and API documentation — Large language models, generative AI, safety and societal impact.

Google DeepMind
Research papers and blog — Reinforcement learning, AI for science, AGI and ethics.

Meta AI
Research papers and blog — Large language models, computer vision, AI for social good.

Hugging Face
Transformers library and model hub — Open-source state-of-the-art NLP models.

TensorFlow and PyTorch
Documentation and community forums — Core frameworks illustrating practical capability.

arXiv
cs.AI, cs.LG, cs.CV, cs.CL — Pre-print research.

NeurIPS and ICML
Conference proceedings — Top-tier academic research.

ACM and IEEE
Journals and proceedings — ACM Computing Surveys; IEEE Transactions on AI.

Kaggle
Datasets and competition solutions — Applied machine learning on real-world problems.

The Alan Turing Institute
Research and reports — Responsible and applied AI.

III ETHICAL AND RESPONSIBLE AI DEPLOYMENT

NIST

AI Risk Management Framework — Voluntary framework for managing AI risk.

European Commission

AI Act — Risk-tiered legal framework for AI.

Ethics Guidelines for Trustworthy AI — Principles for responsible development.

Partnership on AI

Research and best practice — Responsible AI development.

AI Now Institute

Annual reports — Social implications: power, inequality, rights.

ACM FAccT

Proceedings — Fairness, accountability and transparency.

Data & Society

Publications — Social implications of data-centric technology.

WIPO

Conversation on IP and AI — Intellectual-property implications of AI.

IEEE Global Initiative on Ethics of A/IS

Ethically Aligned Design — Recommendations for ethical AI design.

Center for AI and Digital Policy

Policy briefs — Accountable AI policy.
